

DIMAS ARYA RAMADHAN SETIAWAN

Technical Project Manager | Full Stack Developer | Machine Learning Enthusiast

+6287894818389 | dimsaryars2215@gmail.com | Indramayu, West Java

Profile

Fullstack Developer and Machine Learning enthusiast in the 7th semester of a D4 Software Engineering program. Experienced in developing web applications using Laravel, MySQL, and PostgreSQL, building frontend interfaces with JavaScript, Bootstrap, Tailwind CSS, and React, and developing machine learning models using Python and LSTM. Have basic experience in building simple mobile interfaces using Flutter. Familiar with RESTful API development and working on academic projects, MBKM programs, internship, and independent projects, with an interest in backend systems and AI integration.

Hard Skill

• PHP	• AJAX	• JQUERY
• JAVASCRIPT	• MYSQL	• POSTGRESQL
• LARAVEL	• WORD	• MACHINE LEARNING
• FLUTTER	• EXCEL	• NEXT JS
• PYTHON	• REACT JS	• BOOTSTRAP
• CSS	• TAILWIND CSS	• TRELLO

Soft Skill

• Time Management	• Brainstorming	• Leadership
• Public speaking	• Teamwork	

Experience

Campus Project – Intellectual Property System | Politeknik Negeri IndramayuSep 2023 - Nov 2024

Project Manager & Fullstack Developer

(System Analysis and Testing Responsibilities)

- Led the project as Project Manager, coordinating development tasks and monitoring team progress.
- Conducted system analysis, including requirement gathering and database design.
- Developed core application features as a Fullstack Developer using Laravel and MySQL.
- Built authentication features and dashboards for users and administrators.
- Performed functional testing and validation to ensure system reliability.
- Coordinated issue fixing and improvements based on testing results.

MBKM Project – Innovation and Research Dashboard | Politeknik Negeri IndramayuSep 2024 - Mar 2025

Fullstack Developer

- Developed a web-based dashboard for managing innovation and research data using Laravel and MySQL.
- Implemented form validation using AJAX and Laravel controllers.
- Designed and integrated RESTful APIs to support data exchange between system modules.
- Participated in feature planning and system discussion with the project team.

MBKM DBS Foundation Program

Feb 2025 – Jul 2025

Machine Learning Engineer

- Participated in a 6-month industry-based learning program focused on Machine Learning and AI applications.
- Developed an emotion detection system (Rasa Kata Project) using an LSTM model, deployed via Flask REST API.
- Containerized the AI model with Docker and integrated it with an Express.js backend, enabling seamless real-time predictions.
- Used GitHub for version control and collaborative development with the team

Internship - MyBTP Super App Web Based | Bandung Techno Park

Fullstack Developer

Jul 2025 - Present

- Developed a web-based application using Laravel for the backend, and Livewire, Tailwind CSS, and JavaScript for the frontend.
- Collaborated with the team to define the design and key features of the external grants
- Built backend system and database with PostgreSQL
- Used GitHub for version control and collaborative development with the team

Self Project – Autonomous Bimbel Platform (In Progress)

Fullstack Developer

Jul 2025 - Present

- Building the frontend with Next.js to ensure responsive UI and smooth learning experience.
- Designing and implementing RESTful APIs using Express.js for user, content, and progress management.
- Exploring the concept of an autonomous learning system powered by AI for personalized progress tracking and adaptive quizzes.
- Serving as the lead developer and system architect, responsible for end-to-end development, including authentication, database design, and feature planning.

Education

- **SMA Negeri 1 Sindang** 2019 - 2022
- **Politeknik Negeri Indramayu** 2022 - Present
D4 in Software Engineering (7th Semester, IPK: 3,88
Expected Graduation: October 2026)
